

## TECHNICAL DATASHEET

# Clip-it ALUMINIUM

Our GutterClad™ CLIP-IT Capping System is made from a high quality Aluminum which effectively protects masonry from rain, snow and moisture.

The CLIP-IT wall capping allows a colorful accentuated Roof edge by using subtle color choices to match the architecture. There is a broad spectrum of RAL colors to choose from.

All products are manufactured from Polyester Powder coated Aluminium.

The system includes all industrially prefabricated special shaped parts, such as welded corners, Upstands etc. and end caps.

The system also allows for the removal of components if and when required as per end users requirements.

## Technical Information
